

## Educational Content Developer

We are currently planning to begin a new program under Prerak and BetterEd that aims to transform 700 government preprimary schools and set up 50 evening schools (for children aged between 7 and 12) in slums. We are looking to compile educational games, lesson plans, educational videos into a scalable learning program.

Timeframe: All year round

Location: Online

### Responsibilities

You will be working with a team of other interns / core TIDE members to curate and compile educational materials (games, educational and conceptual explanation based videos, discussion questions, project activities and supporting art/craft activities). Your responsibilities will include developing a curriculum that matches the school curriculum, however, at the same time caters to learning gaps and brings about understanding based learning. On the basis of the curriculum you will need to curate and compile existent educational materials in a teacher friendly manner. These compiled resources will later be used across the various centres and anganwadi in the near future.

### Qualifications

This program is open to undergraduate students, post-graduate students, pass-outs and working professionals.

- a) Have an understanding of how children learn (education major or subject specific experts are preferred)
- b) Should possess strong communication (written and oral) and time management skills.
- c) Prior volunteering experience or experience with data collection with NGOs although not required is preferred
